

Joel Paul

OPEN SOURCE DEVELOPER | COLLEGE STUDENT From Bengaluru Karnataka India
Mob No: (+91) 9353 804185 | Mail ID: joelpaul688@gmail.com | LinkedIn: linkedin.com/in/jack-pots | Github: github.com/jack-pots

SUMMARY

Aspiring Full-Stack Developer and BCA student with a 8.4 GPA and 4+ years of technical project experience. Proven track record in competitive debugging and IT. Active open-source contributor with expertise in Java, Node.js, and Android development, dedicated to building scalable, user-centric applications.

EXPERIENCE

Brand Partnership Manager

MeVia | OCT 2025 - DEC 2025
Maintained CRM and Customer Analytics

EDUCATION

Gopalan College of Commerce, Whitefield

BACHELOR OF COMPUTER APPLICATION | GPA: 8.4 | APRIL 2023 - PRESENT

Ryan International School, Kundalahalli

PRE-UNIVERSITY COURSE | PCMC | MAY 2021 - MARCH 2023

TECHNICAL EXPERIENCE & PROJECTS

JPass | Creator & Maintainer

Local & Secure Android Password Manager with Authentication

Tech Stack: Java, SQLiteDB, XML | Tool: Android Studio.

- Developed a secure Android password manager with biometric authentication.
- Implemented local data storage using SQLite for enhanced security.
- Improved user experience with responsive UI design.

ExamDawn | Co-Founder/Creator & Maintainer

Content Website for BCA College Students

Tech Stack: Vue.JS, HTML, TailwindCSS, Markdown, Python, Shell

- Built a content-driven platform providing academic resources and notes.
- Designed scalable frontend architecture using modern frameworks.
- Automated content workflows using Python and shell scripting.

FOSSonTop | Site Content Contributor

Wiki to work with Open-Source Projects

Tech Stack: Markdown

- Contributed technical content to help developers explore open-source projects.
- Improved documentation clarity and accessibility.

CERTIFICATES

Introduction to Cloud Computing

Mastered cloud service models and deployment strategies to optimize infrastructure.

IBM

2026

Introduction to Software Engineering

Applied the SDLC, Agile methodologies, and version control to build software.

IBM

2025

Artificial Intelligence Fundamentals

Explored Machine Learning and Neural Networks with a focus on AI ethics.

IBM

2025

Stanford University's Code in Place

Completed an intensive Python course focused on logic and data structures.

Stanford University

2025

KEY ACHIEVEMENTS

Second Place in Debugging Competition

conducted by the Tech Heist 2K25 East Point College in the Fifth Semester of College | 2025

Second Place in IT Quiz

Carried out by the Science Club in the Fourth Semester of College | 2024

First Place in IT Quiz

Organized by the NeoTech Club in the First Semester of College | 2023

SKILLS

HTML / CSS • JavaScript • XML • Node.JS

Python • Java • JSON • Git • Linux • CAD

C • Bash

INTEREST

Open-Source Contributor

Participating in community contributions through OS projects focusing on improving code maintainability and documentation.

Web & Android Development

Building scalable web and Android applications with a focus on intuitive User Experience (UX).

Electronics Hobbyist

Participating in Software and Hardware Hackathon events

Modeling & CAD

Conceptualizing and designing complex 3D systems

Computer Vision and AI/ML

Experimenting with PaddleOCR and Mediapipe
